

Richard A. Rezek was a partner in the Indianapolis office of Barnes & Thornburg. He practiced primarily in the area of intellectual property and trade regulation, concentrating in patent preparation and prosecution, licensing, and domestic and international technology transfers. He worked with entrepreneurs, closely held businesses, and large companies to protect their products and services. He was familiar with international patent practice and has helped clients obtain worldwide patent protection for their products and processes. He also helped clients manage their worldwide patent portfolios.

Richard prepared and prosecuted patent applications and managed patent portfolios relating to the following technologies:

- Automotive - onboard refueling vapor recovery systems, oil filters, air filters, fuel filters, automotive thermostats, carbon canisters, testers for fueling and cooling systems, automotive pressure testers, fuel caps, capless fuel tank filler necks, vehicle passenger seats, and vehicle exhaust systems;
- Consumer Products - juvenile car seats, playyards, high chairs, strollers, bouncers, booster seats, gates, latches and locks, bassinets, bed rails, drawer slides, housewares, home and office furniture, containers, closures, overcaps, drink cups, prescription packaging, polymeric films, tapes, Oxygen Therapy Units, Oxygen Conserving Devices; and
- Industrial - industrial gas and oil-fired burners, shut-off valves, ratio and flow-control systems, low NOx burners, fiberglass insulation materials and manufacturing systems, corrugated packaging, pipe coatings, electronic packaging hardware, solid bearing slides, cabinets and racks, helicopters, and concrete finishing machines.

Richard attended Purdue University in West Lafayette, Ind., where he
