

Legal Updates For The Logistics And Transportation Industry

DATE

October 26, 2016

SPEAKERS

Gerald F. Lutkus
Of Counsel
(Retired)

Timothy J. Maher
Partner

Jason A. Bernstein
Partner

David B. Ritter
Partner

If your company transports goods or has goods transported from one place to another, this program is for you. The seminar will feature lawyers and transportation professionals discussing timely topics of interest to your business, such as carrier insurance and liability, owner-operator employee issues, driver retention and training, and what happens during a DOT investigation.

Misclassification of Independent Contractors: The Potholes Are Getting Deeper

Jerry Lutkus, Barnes & Thornburg

Federal and state authorities have identified misclassification of employees as independent contractors as an example of “wage theft”. The U.S. Department of Labor has even suggested that 70% of workers identified as Independent Contractors are classified incorrectly. Recently the National Labor Relations Board concluded that in certain circumstances misclassification can be an unfair labor practice. We'll take a look at the current status of the Independent Contractor status and offer some practical suggestions on how to deal with this issue.

It's Not as FAR as You Think

Tim Maher, Barnes & Thornburg

The increased demand for next-day delivery has moved many vendors directly or indirectly into air freight operations which are governed by the Federal Aviation Regulations (FAR). Lack of familiarity with FAR requirements can result in an uncomfortable encounter with the FAA, which has discretion to impose significant fines. Understanding how and when you or your customers will be subject to FAR can help you avoid these problems. We will discuss FAR's applicability and what to do if you receive a Notice of Proposed Civil Penalty from the FAA.

Cybersecurity for Logistics and Transportation: Attacks, Defenses and Risk Transfer

Jason Bernstein, Barnes & Thornburg

Jason will cover: Trends in types of attacks, How to protect against attacks and defend when an attack occurs, Managing and transferring liability and risk in
