

WHOLESALE AND RETAIL PHARMACY

Better Health

We help retail, institutional and specialty pharmacy clients manage regulatory compliance related to the sale, transfer, distribution, dispensing, and administration of prescription drugs, as well as with their licensing, pricing and reimbursement matters.

Pharmacies and pharmacy professionals turn to us for guidance on regulations associated with the flow of drugs from manufacturers, wholesalers and specialty pharmacies to physicians, hospitals and patients.

Because our experience is broad and deep, we advise on an array of legal issues associated with the wholesale and retail pharmacy industry, such as:

- Board, state and federal licensing requirements necessary to pharmacy operations
- Pharmacy law with respect to the stocking, dispensing and pricing of drugs
- Rules governing reimbursements, including Medicare and Medicaid
- Confidentiality issues such as HIPAA audits and compliance programs
- Representation before state regulatory bodies governing retail and wholesale pharmacy practices and procedures
- Therapeutic substitutions
- Maintaining compliance with FDA, DEA, CDC and other relevant licensing board laws and regulations related to administering drugs, therapeutic services and other healthcare services

Our firm is called upon to advise pharmacy professionals with Pharmacy

Why Barnes & Thornburg?

Finding new ways to help clients identify solutions and new business opportunities, across industries, is at our core. We are, at times, more than lawyers, we are advisers bringing new ideas to light. We understand what keeps you up at night and work collaboratively to find practical and creative solutions, at the heart of business.

RELATED PRACTICES

Drug and Medical Device

Hospitals and Other Healthcare Providers

Life Sciences

Practice Act licensing requirements for pharmacies, pharmacists and anyone else engaged by the pharmacy in connection with pharmacy-sponsored programs. We counsel clients on services provided directly to patients, including vaccinations, testing services and diabetes education programs. We deliver actionable advice on the necessary pharmacy protocols for certain medical physician practice management services and other service providers. Moreover, clients turn to us for representation involving state and federal licensing and Clinical Laboratory Improvement Amendments (CLIA) requirements.
